## THANK YOU !

Thank you for choosing this innovative Amcor product. We suggest that you keep this manual in a safe place for future reference. It describes the many benefits and advanced features this unique product has to offer. Before you use it, you should carefully read these instructions to maximise this product's performance.

For over 50 years Amcor has specialised in complete indoor environmental control, manufacturing and marketing dehumidifiers, portable air conditioners, coolers, air purifiers, ionisers and aromatherapy scent diffusers. These world class products incorporate the latest technological developments.

## IMPORTANT SAFETY INSTRUCTIONS

Before any installation, use and maintenance operation, read the safety instructions in this manual carefully.

Remove all packaging materials from the unit, keep it away from babies and small children to avoid the danger of suffocation.

Before inserting the plug make sure that the voltage is within the range indicated on the rating label on the unit.

The Insect Catcher is intended exclusively for the use for which it was created. Amcor is not responsible for any damage caused by improper use.

The Insect Catcher is safe, however as with other electrical appliances, use it with care.

## WARNING

- Never operate this appliance if it is damaged or if it has a damaged cord or plug.
- Do not lead the cord over sharp edges.
- A damaged supply cord should be replaced by the manufacturer, its service agent or a qualified person in order to avoid a hazard.
- Any service other than regular cleaning or foil replacement should be performed by an authorized service representative. Failure to do so could result in a loss of warranty.

**Reminder:**

Waste electrical products must not be disposed of with household waste.  
This product should be taken to your local recycling centre for safe treatment.

**IMPORTANT!**

- The unit is designed for indoor operation.
- Rating: This unit must be connected to a 220-240 V / 50 Hz earthed outlet.
- The installation must be in accordance with regulations of the country where the unit is used.

**If you are in any doubt about the electrical installation, have it checked and if necessary modified by a qualified electrician.**

- Unplug when not in use. Do not unplug by pulling the cord.
- Do not operate this product with wet hands.
- Keep out of the reach of children.
- Do not clean the unit by spraying it or immersing it in water.
- Disconnect it from the mains before cleaning the unit or any of its components.
- Always unplug before changing the adhesive foil.
- Do not connect the unit to an electrical outlet using an extension cord. If an outlet is not available, one should be installed by a licensed electrician.

**Do not use your Insect Catcher under the following conditions:**

If the power cable wires are frayed or cut

When small children may be left unattended

On a slope or uneven surface

Close to a heat source

This product is not made for DIY repair

If there is a risk of liquid falling on the unit

Inside unit exposed to the weather outdoors

Near water

If an extension cord is needed to reach an outlet

Where the power cable may be damaged

Where it may be damaged by chemicals

Where there is a risk of interference by foreign objects

## SIMPLE WORKING PRINCIPLE

The light of the special UV-A lamp in the Insect catcher attracts flying insects commonly found in a household environment. An adhesive foil is placed in a half circle around the lamp. When insects touch the adhesive foil, they are caught and die. The odour of dead insects helps attracting other insects, making your Insect catcher very effective.

## PLACE ANYWHERE

The Insect catcher can be placed where flying insects are a nuisance. All flying insects susceptible to UV-A light will be trapped: common houseflies, wasps even flying aphides. The ultraviolet light which attracts the insects is harmless to humans and pets.

Place the Insect catcher in the darkest area of the room on a flat surface, or mount it at about 2 m height on the wall with the reflector facing the wall. In this way the foil with dead insects is out of sight, the capturing capacity is not affected. Do not place the Insect catcher in a damp or wet area and always at least 15 cm from curtains and the like.

## WALL MOUNTING

Make sure that the wall is solid and free of electrical cables and pipes inside.

- Remove one of the panels.
- Fix the bracket with the supplied screws and plugs to the wall, as shown.

The wall should be free of obstruction to allow easy cleaning and removal of the panel for adhesive foil replacement.

## ASSEMBLE, CONNECT AND LEAVE ON

Place the panel(s) gently but firmly in the slots in the foot of the Insect catcher. Connect to the mains.

The Insect catcher can be left on, it has a very low power consumption and is silent and odourless.

The Insect catcher is environment friendly.

## REPLACING THE ADHESIVE FOIL

The foil must be inserted into the special guides of the panel, as shown in the picture.

Hold the foil at the top corners.

Pull the protective film tearing it off along the dotted lines.

Make sure the sides remain in place (otherwise the adhesive foil will stick to the guides of the Insect catcher and difficult to remove).

## CLEANING AND MAINTENANCE

**Before cleaning disconnect from the wall socket.**

### Panels

Use a damp cloth to clean the panel(s) and foot, NEVER dip it in water. Make sure the Insect catcher is completely dry before re-connecting.

### Foil

The adhesive foil is easily changed. This can be done as often as needed.

### UV-A Lamp

The special purpose lamp last for approximately for 4,000 hours.

The fluorescent ultraviolet lamp in the Insect catcher is designed for maximum attraction to flying insects.

The UV-A lamp may not be replaced.

## TECHNICAL DATA

Mains	220-240 V / 50 Hz
Power consumption	18 W
Effective range	8 - 10 m
Dimensions w x d x h	20 x 12 x 27 cm
Weight	1.2 kg

Technical data is subject to modification without prior notice.  
Information provided in this manual is not legally binding.

### Reminder:

Waste electrical products must not be disposed of with household waste.  
This product should be taken to your local recycling centre for safe treatment.
